

## **Best Practice-1**

### **Udali College, Bamungaon, Nagaon**

#### **1. Title of the practice : Slow Drive , Save Life.**

#### **2. Objectives :**

Road safety is a critical concern that affects individual of all ages including colleges students. As a college it is an utmost responsibility to raise awareness about the importance of road safety and equip our students with the knowledge and skills necessary to become responsible drivers. By adopting safe practices on the road , we can significantly reduce accidents , injuries and even save life. Some safety measures that our college ensures a safer driving are like :- Obey traffic rules , avoid distract driving , Not to use mobiles while driving , Use sit belt ,wearing Helmet etc.

The objectives are as follows :-

- To promote a responsible attitude towards road safety.
- To reduce and completely remove out the road accidents.
- To encourage the students to follow the traffic rules and wear Helmets and seat belt while driving.
- To make the students aware to identify the significant roads signs.
- To aware the students about the speed limit of vehicle to prevent road accidents.

#### **3. The Context :**

The faculty members and the college authority are aware of the value of obeying traffic rules on roads and importance of the considerable driving for the existence of human being.

#### **4.The Practice:**

Road accidents have become a burning problems now-a-days . It has become a regular feature. Various accidents are reported everyday from the different parts. Road accidents take away the lives of many innocent human being the college family has made a very sincere awareness programme on road safety .The students are informed about the traffic rules and the significant of road signs.

#### **5.Evidence of success:**

Udali college from the very beginning has been engaged with various roads safety programme . The college has organise a road safety rally and it got a good number of responses . Moreover, the NH-54 runs infront of our college and we placed a request to the Deputy Commissioner of Hojai District for a well divider on the Highway as it is an accident prone area. The Honourable DC granted our prayer.

#### **6.Problems Encountered and Resources Required:**

To achieve better responses the following problems are encountered :

1. Most of the drivers do not know the exact speed limit while crossing over an institution.
2. Because of not having the divider yet, the students and the college family face problems while crossing road.
3. Some new bikers from the students drive their vehicles ignoring the traffic rules.

#### **7.Notes :**

1. The institution has made various slogan on road safety .
2. The students are informed every year at the time of admission to keep their vehicles in the specific stand i.e, out side of the college boundary.

## **BEST PRACTICE-2**

### **1.Title of the practice : Plant a Tree, Plant a new Life.**

### **2.Objectives :**

The Udali College is located in the rural area of Lanka, Hojai under Nagaon district of Assam. The College is located nearby the NH-54 and it has about 9 Bighas of land having sufficient space for plantation in the college premises, local areas, adopted village "Ghoshai Gaon Monipuri Basti". There are some plants in the college campus. The main objective of the practice of plantation is to reduce temperature and increase humidity. It gives shade and shelter to many people. Birds built their nests.

Tree plantation drives combat many environmental issues like deforestation, erosion of soil, desertification in semi arid areas, global warming enhancing the beauty and balance of the environment. Trees absorb harmful gas's and emit Oxygen resulting in an increase in Oxygen supply. The following are the main objectives :

- To motivate the students for plantation.
- To make the students aware of the importance of plantation.
- To know the value of environment, benefits of trees, beautification in and around the College.
- To beautify the areas for scenic beauty.
- To provide knowledge among students about the ecological balance between human lives and trees.

### **3.The Context:**

The Udali College family members are aware of the value of trees in nature and importance of plantation for the existence of human kind on this earth. The very worth mentioning objective of the tree plantation program is done in the college by its stakeholders is to save our planet. The very noble objective of the tree plantation program in every activity of the college by its stakeholders is to save our planet and earth from the following disasters.

- The increasing poisonous gas would become a threat to the earth due to the decrease of Trees.
- Due to deforestation, the level of natural Oxygen is decreasing day by day and as a result, the level of Nitrogen is increasing rapidly. If this process continues, the temperature of the globe will be increased and create danger to the earth.
- Due to global warming, there arise so many natural problems around the globe. Nature lost its balance and sometimes create disturbance to humankind.

#### **4.The Practice:**

It can be rightly said that the task of plantation has become the best practice not only for teachers and students but also for all human beings. Almost in every year the College family including students have been planting tree in the College premises, road side, adopted village. The task of plantation in these areas inspire and encourage the students and the local people to go through the path of plantation for the balance of nature.

#### **5.Evidence of success:**

Udali College has been engaged with the task of plantation trees and the evidence of success is the number of big trees in, out and back side of the College. The College Authority has planned to plant almost 1000 saplings on the backside of the college premises very soon. Furthermore, the evidence of success also proves the big Teak(*Tectona Grandis*) tree on the College campus and big Arjun tree(*Terminatia-Arjuna*) near the College Gate. The Evidence of Success indicates...

- a. There has been growing awareness among the students towards environment pollution and importance of tree plantation.
- b. A sense of social responsibility has grown among the students
- c. Local people have been motivated for plantation.
- d. The students are encouraged to take care of newly planted trees.

e. The students are made aware of global warming.

## **6.Problems Encountered and Resources Required:**

To achieve success the below mentioned problems are enclosed in the plantation program:

1. Though the trees are planted with great care by the College family but the neighbourhood did not care of them properly. Consciousness of the locality is highly required on this task.
2. Due to ignorance of the people of the locality the cattle damaged the planted trees just within a few days of the plantation.
3. The rate of the saplings is very high to effort.
4. Iron net/Brick wall is required for protection of the plants.

## **7.Notes:**

1.There are about 20 numbers of big trees infront of the College but the construction of the NH-54 demolished all these.

2.The College authority makes it compulsory to submit at least one photo of tree plantation at the time of odd Semester admission.
